

TECHNICAL DATA SHEET

USE

Dayton Superior's Flooring Materials Tool Kit consists of all the tools necessary to mix up and install self-leveling underlayments and toppings. The kit can also be used for decorative concrete jobs as well. Professional Flooring Installers who know the importance of having the right tools to successfully complete the job were instrumental in designing Dayton Superior's Flooring Materials Tool Kit.

ADVANTAGES

Dayton Superior's Flooring materials Tool Kit Includes:

- 15 Gallon Heavy Duty Mixing Drum with Handles - Allows for mixing up to 2 bags per batch - Easy to carry and pour from
- 10 Quart Bucket with Graduated Markings - Measures pints, quarts & liters - Heavy Duty with plastic pour spout - Eliminates the need for separate measuring containers for different products
- 24" Gauge Rake (Spreader) with 3 different cam sizes for proper depth adjustment - Maintains proper depth of self leveling products - Won't change depth during installation - 3 Sizes include: Size 4 Cam Set = 1/8" depth Size 6 Cam Set = 1/4" depth Size 8 Cam Set = 1/2" depth
- 24" Smoothing Paddle - Angled blade with curved edges for ease of use and less edge lines - Breaks the surface tension of freshly applied material allowing air to escape while smoothing the surface of the material
- Mixing Paddle - Versatile mixing paddle for use with all underlayments and toppings
